ELECTORAL DIVISION PROFILES: AN INTRODUCTION

These profiles have been produced to support elected members, constituents and other interested parties in understanding the demographic, economic, social and educational profile of their neighbourhoods. We have used the latest data available at the time of publication.

Much more data is available from national and local sources than is captured here, but it is hoped that the profile will be a useful starting point for discussion, where local knowledge and experience can be used to flesh out and illuminate the information presented here.

The profile can be used to help look at some fundamental questions e.g.
- Does the age profile of the population match or differ from the national profile?
- Is there evidence of the ageing profile of the county in all the wards in the Division or just some?
- How diverse is the community in terms of ethnicity?
- What is the impact of deprivation on families and residents?
- Does there seem to be a link between deprivation and school performance?
- What is the breakdown of employment sectors in the area?
- Is it a relatively healthy area compared to the rest of the district or county?
- What sort of crime is prevalent in the community?

A vast amount of additional data is available on the **Suffolk Observatory**

www.suffolkobservatory.info

The Suffolk Observatory is a free online resource that contains all Suffolk's vital statistics; it is the one-stop-shop for information and intelligence about Suffolk. Through data, reports and maps, the Suffolk Observatory provides a comprehensive picture of the County. It is a great source for useful facts and figures that can be used for writing reports and presentations, informing strategic and business planning, preparing funding applications or supporting academic research. Data is presented around the key themes of population, children and young people, health and social care, housing, crime and community safety, deprivation, economy and employment and environment. All areas of the county are covered, right down to district, electoral division, ward and parish level, with information easily accessible in a variety of formats. You can also build your own reports for custom areas.
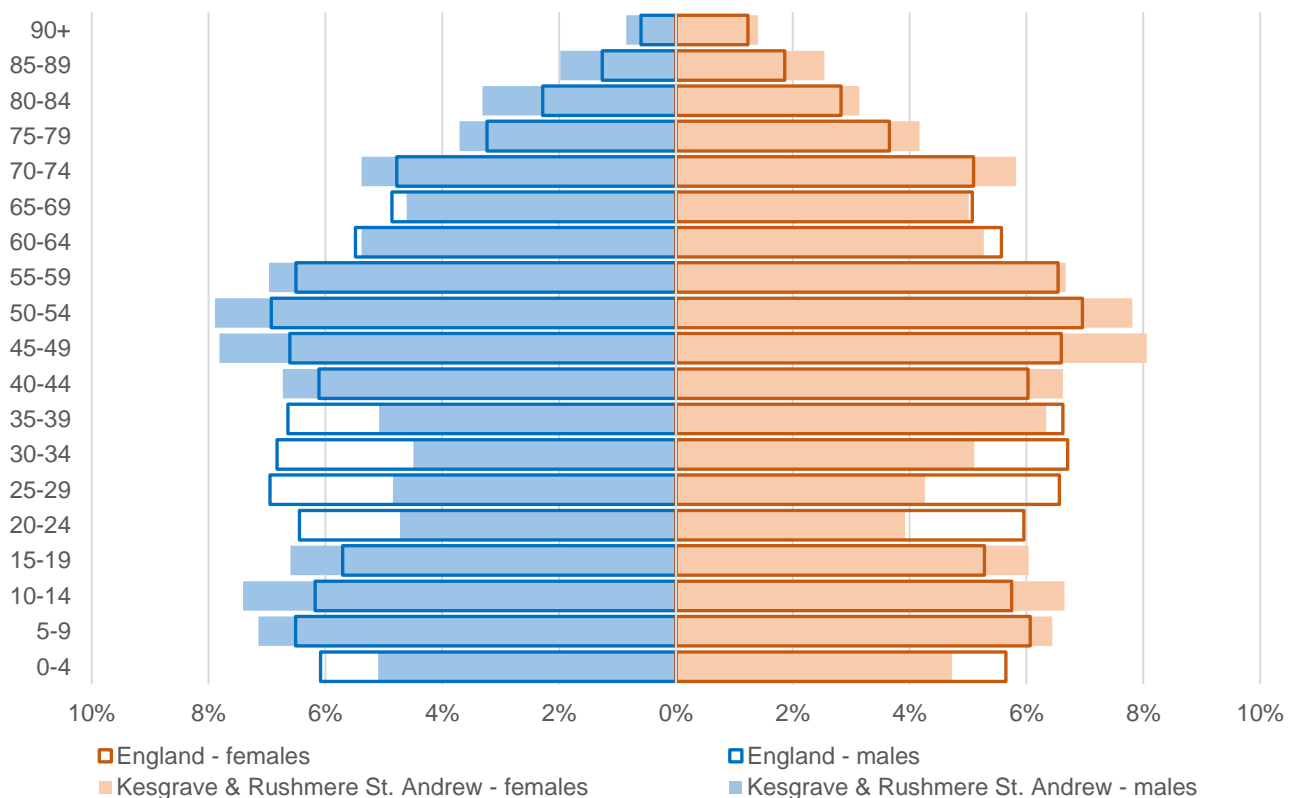

Technical Notes:
1. Where electoral divisions do not exactly match the boundaries at which the data is available (e.g. ward, Output Area or Lower Super Output Area), we have adopted a "best-fit" approach to produce a dataset.
2. District, county and national level data is provided where possible to provide a context for comparisons. Where possible we have used the most recent district boundaries for comparison purposes, but in some cases it has been necessary to use the pre-2019 districts.

DEMOGRAPHIC PROFILE - AGE

In mid-2019, the population of Kesgrave and Rushmere St Andrew stood at 21,480, an increase of 4.3% since the 2011 Census. The age structure of the component wards and the division as a whole is set out below.
	Kesgrave and Rushmere St. Andrew Division	Kesgrave	Rushmere St Andrew	Carlford & Fynn Valley
All Ages	**21,480**	15,724	4,454	1,302
0-4	**1,055**	854	155	46
5-9	**1,458**	1,143	253	62
10-14	**1,509**	1,203	243	63
15-19	**1,356**	1,009	271	76

ECONOMY

There are 2,900 people employed in Kesgrave and Rushmere St Andrew.

Legend: ■ Kesgrave & Rushmere St. Andrew ■ East Suffolk ■ Suffolk ■ England
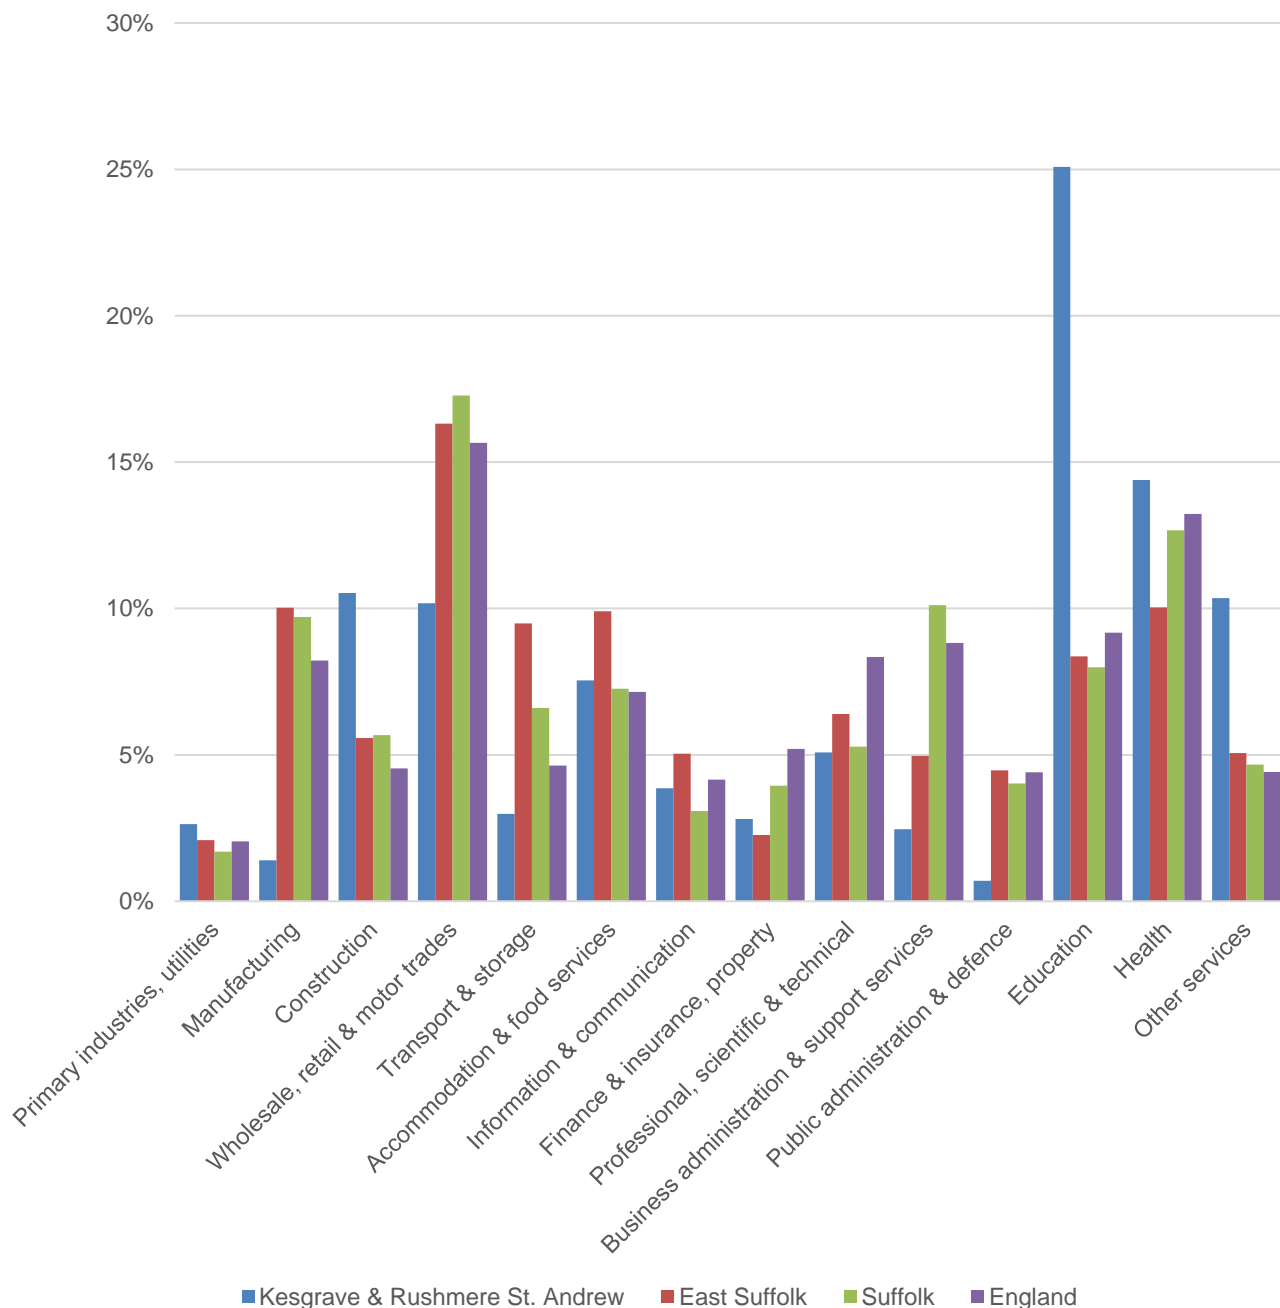

- The education sector stands out as the most important employer in Kesgrave and Rushmere St Andrew, accounting for 1 in 4 jobs in the division, more than double the proportion in East Suffolk, Suffolk or England.
- Health, construction and wholesale, retail and motor trades and other services also each provide more than 1 in 10 jobs in the division.
- Education and construction are particular specialisms in the division as the sectors provide a much larger proportion of jobs than average.

LABOUR MARKET

OUT-OF-WORK BENEFIT CLAIMANT RATE
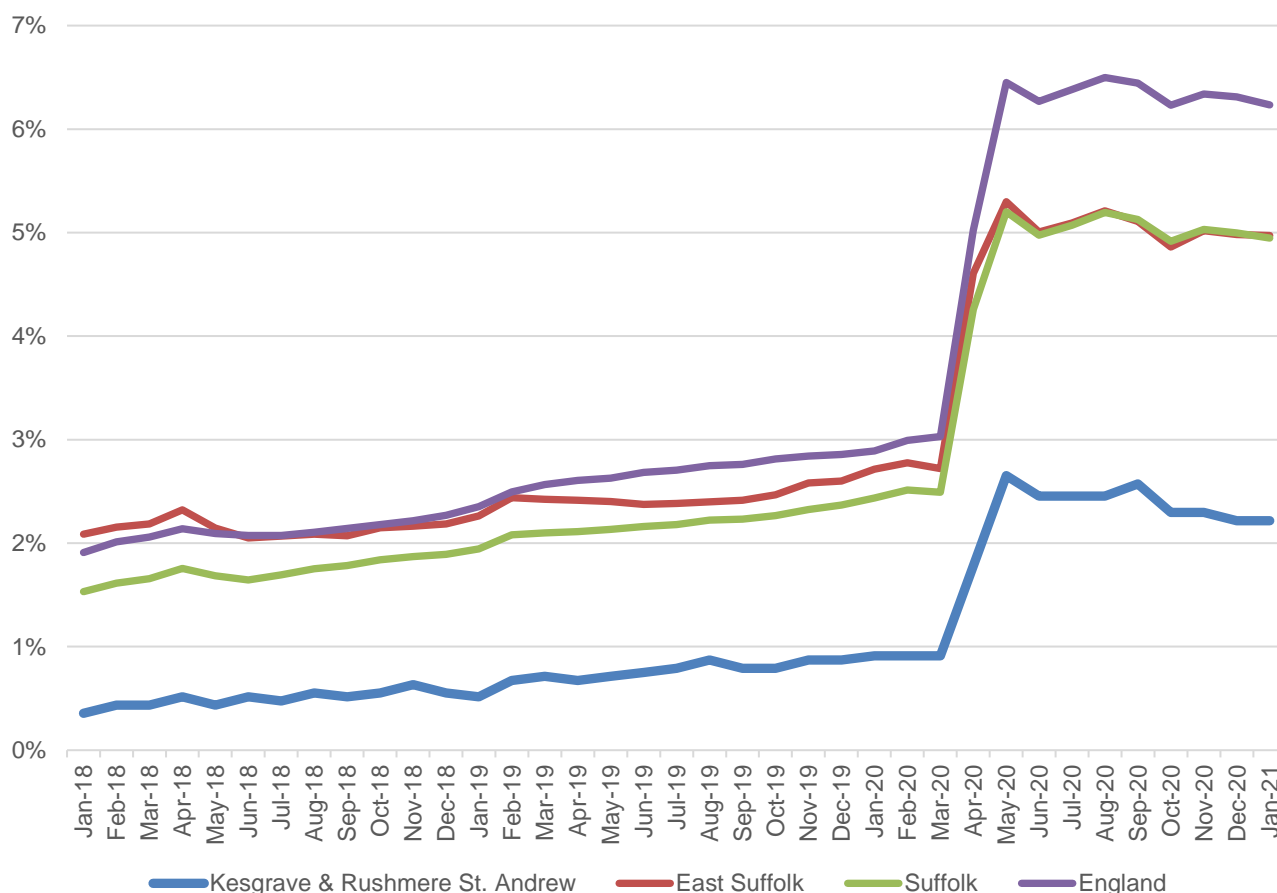

- Kesgrave and Rushmere St Andrew saw a sharp increase in claimants of out-of-work benefits in the first half of 2020 as a result of the COVID-19 pandemic, much like the rest of the county and England as a whole.
- Claimant unemployment levels in the division are consistently below those of the district, county and England as a whole.
- In percentage terms, approximately 2.2% of the working age population of Kesgrave and Rushmere St Andrew are claiming out-of-work benefits in January 2021.

# SCHOOL ATTAINMENT

Foundation Stage Profile (reception)
% pupils achieving Good Level of Development (GLD)
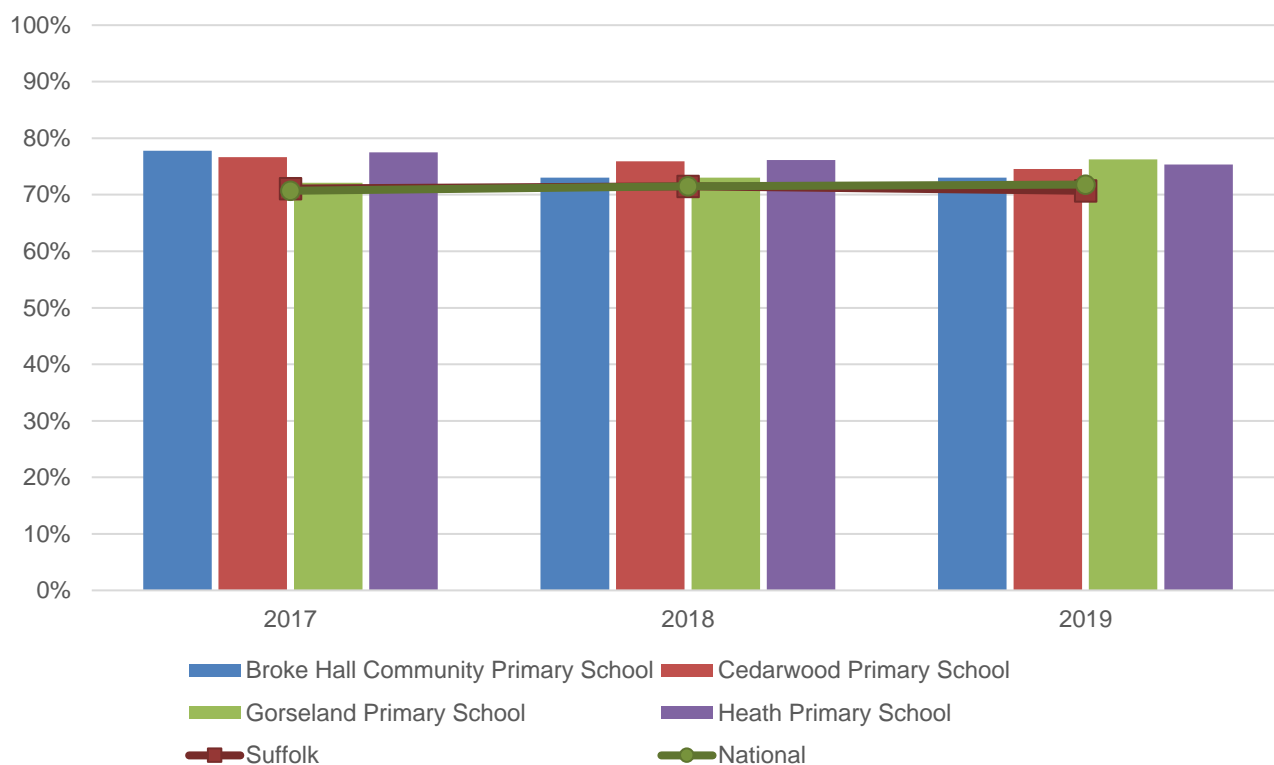

- Foundation Stage attainment across all four schools in Kesgrave and Rushmere St Andrew division has been remarkably stable and above the national average for the last three years.
- There is very little difference in attainment between schools and from one year to the next.

Key Stage 2 (age 11)
% pupils achieving the Expected Level or better in Reading, Writing and Mathematics

- Key stage 2 attainment at schools in Kesgrave and Rushmere St Andrew is generally strong and stable, with most schools achieving results similar to or above the national average over the past three years of data.
- Only 2017 performance at Cedarwood Primary School was below the county average.
- Only Heath Primary School has seen attainment above the national average in each of the last three years.

Key Stage 4 (GCSE) (age 16)
% pupils achieving level 4-9 in English and Mathematics
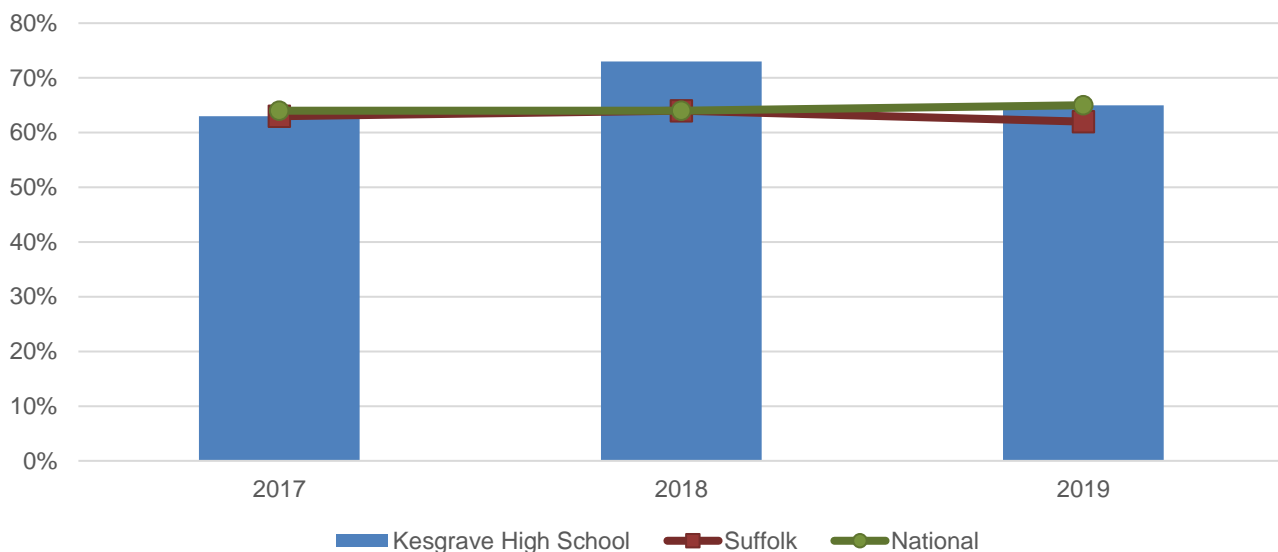

- GCSE attainment at Kesgrave High School has been consistently similar to or above the national average from 2017 to 2019.
- Attainment has fluctuated somewhat over the three-year period. 2018 saw the highest attainment levels at the school, nine percentage points above the national benchmark that year.

Key Stage 5 (A level) (age 18)
A Level Points entry
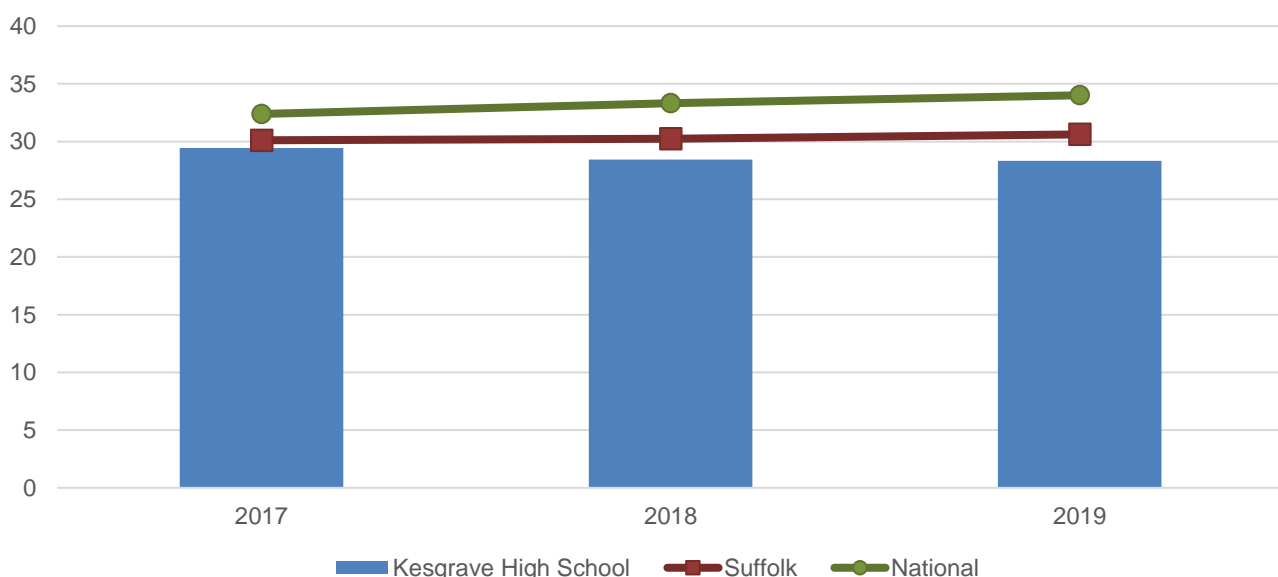

- A level attainment at Kesgrave High School has been consistently just below the national average in each of the past three years.
- Pupil attainment at the school has declined very slightly during this period, in contrast to the gradual improvement seen nationally.

# NEET % (Not in Education, Employment or Training)

- In January 2021, 1.8% of the 16-18 age group in Kesgrave and Rushmere St Andrew were classified as NEET (where current activity is known).
- NEET levels in the division are consistently well below the district and county averages.

INDEX OF MULTIPLE DEPRIVATION (IMD) 2019 (SEE MAP OVERLEAF)

The IMD combines a number of indicators, chosen to cover a range of economic, social and housing issues, into a single deprivation score for each small area in England. This allows each area to be ranked relative to one another according to their level of deprivation. Small areas (Lower Super Output Areas, average population 1,700) are most commonly described as being in 1 of 5 quintile bands. The bottom quintile represents the 20% of areas that are the most deprived in England; these are shaded pale yellow on the map. The top quintile represents the least deprived areas in England and is shaded dark blue.
The Index is widely used to analyse patterns of deprivation, identify areas that would benefit from special initiatives or programmes and as a tool to determine eligibility for specific funding streams.
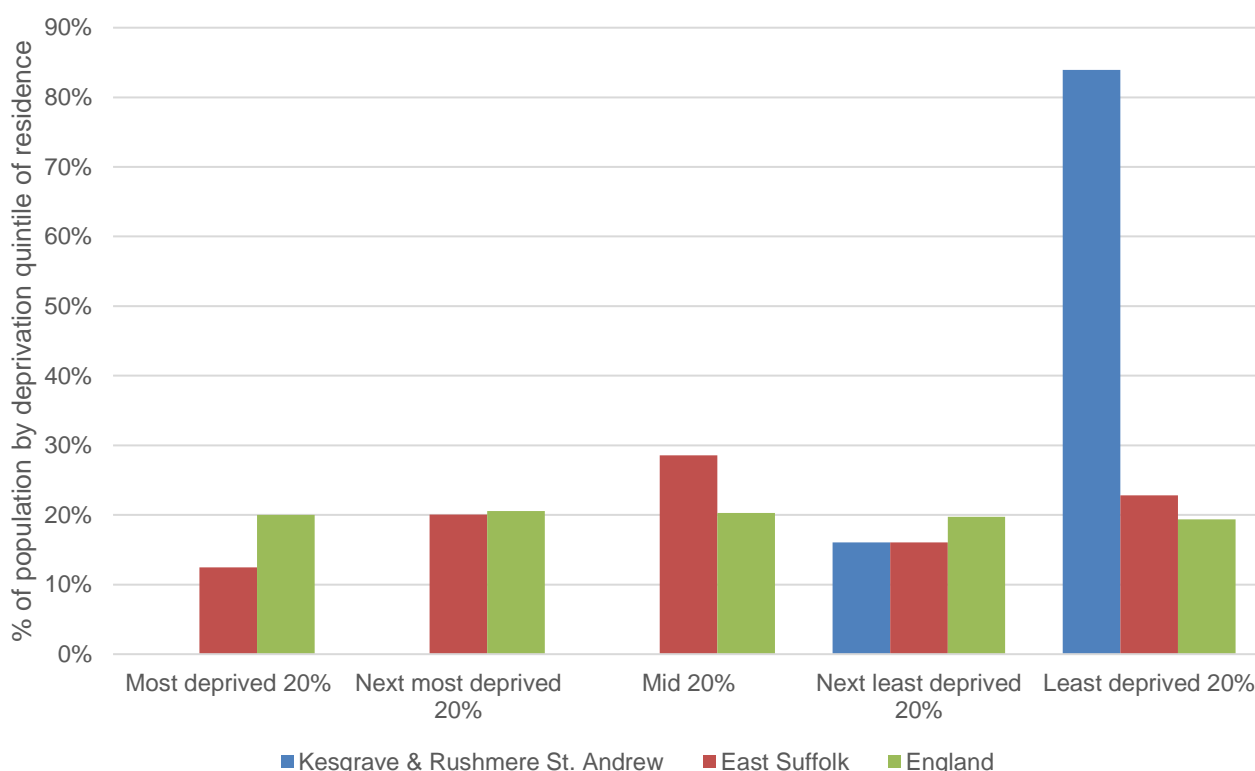

- The IMD 2019 shows that relative deprivation levels in Kesgrave and Rushmere St Andrew are well below district, county and national averages with more than 80% of population living in areas among the least deprived 20% in England.
- Ten of the twelve Lower Super Output Areas (LSOAs) which comprise the division are in the least deprived quintile.
- The remaining two LSOAs are in the next least deprived quintile.
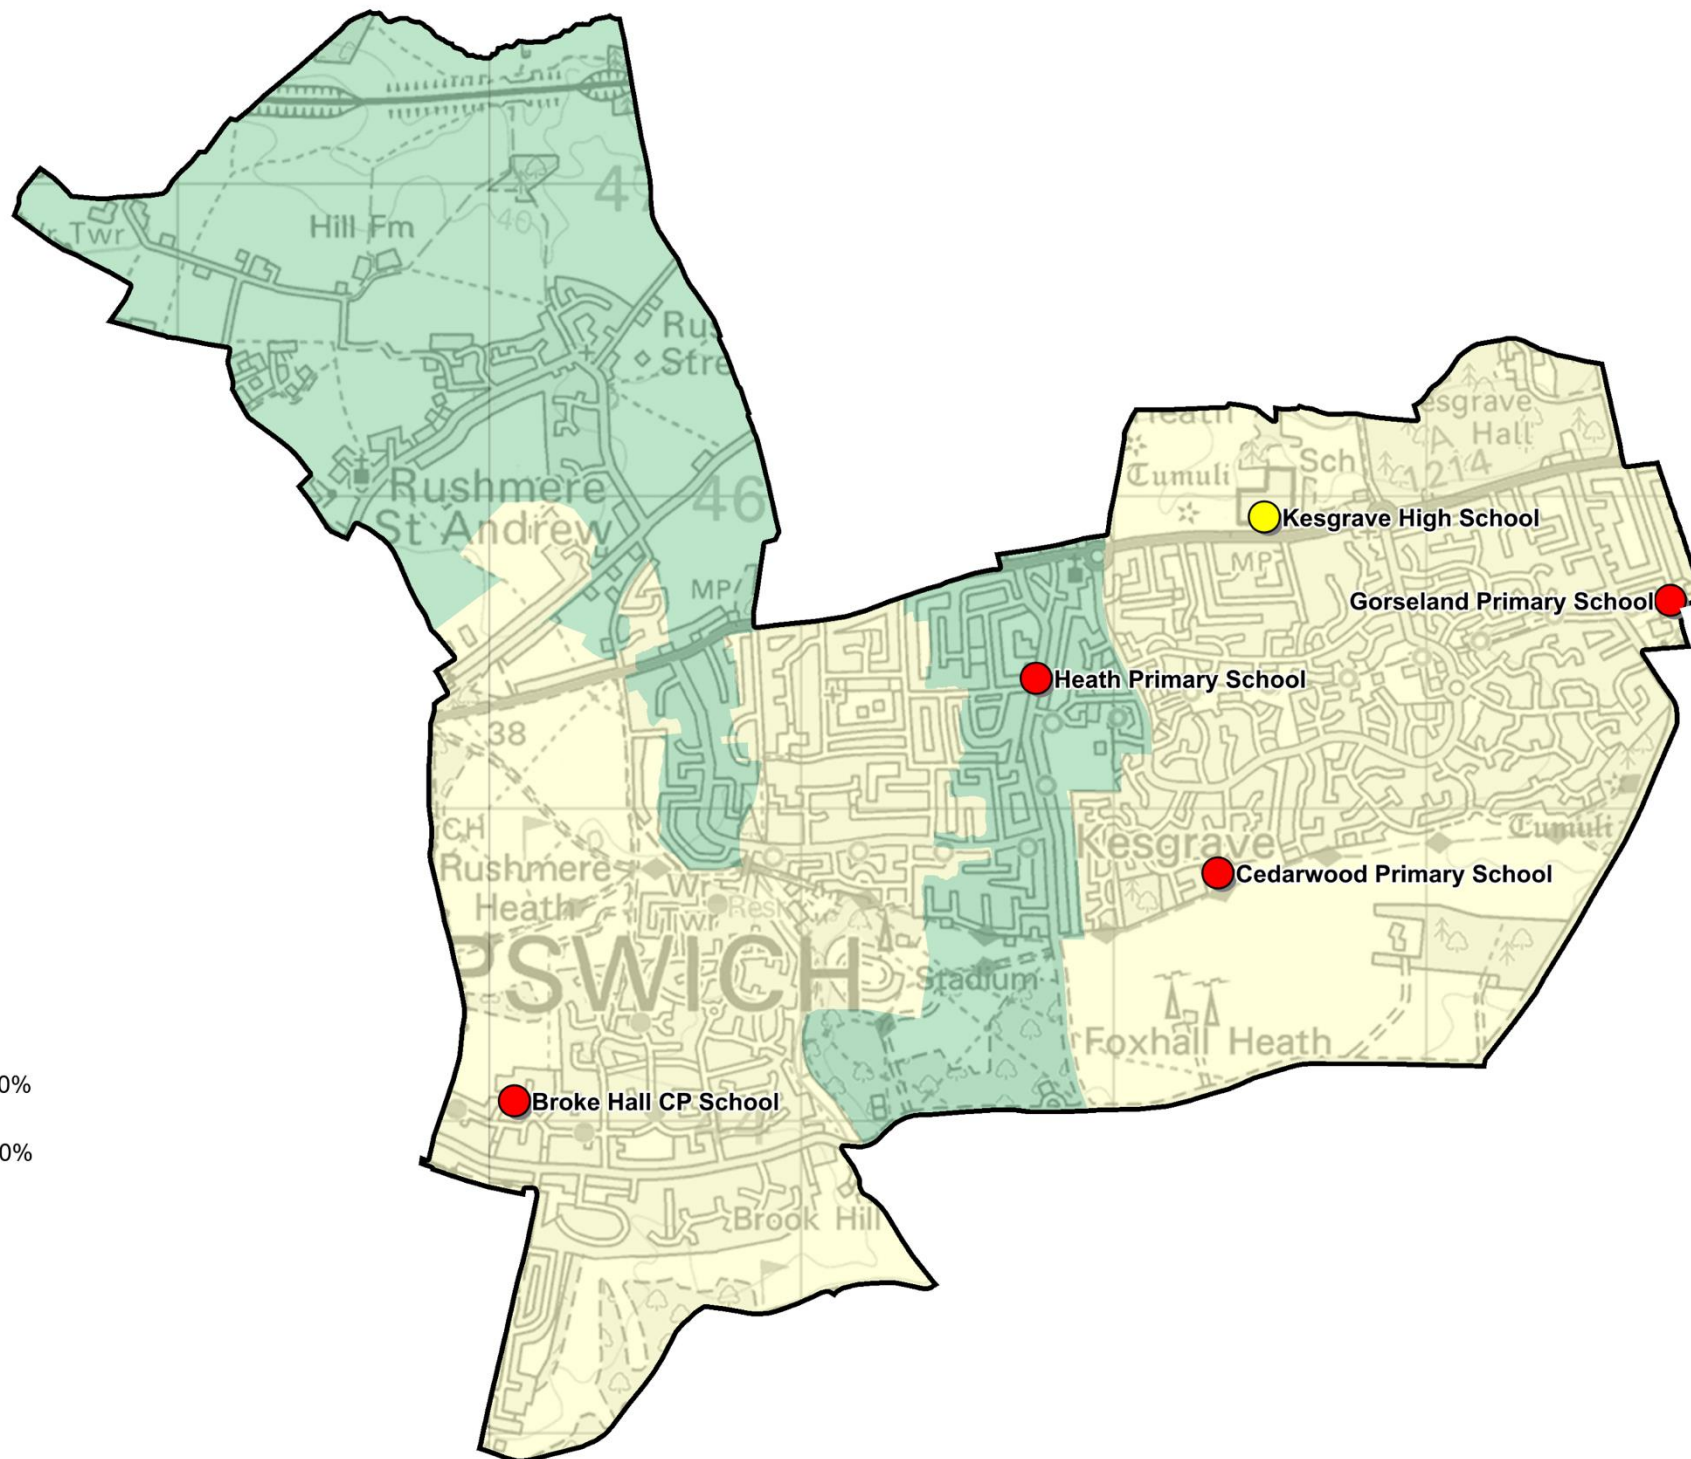

IMD 2019 quintile

- Least deprived 20%
- Next least deprived 20%
- Mid 20%
- Next most deprived 20%
- Most deprived 20%

HEALTH

The local data used here is based on relatively small numbers of deaths. The confidence limits provide an indication of the reliability of the data. The 95% confidence intervals utilised on the chart provide a range within which there is 95% chance of the true result lying.

LIFE EXPECTANCY AT BIRTH

Legend: ■ Life expectancy at birth for males ■ Life expectancy at birth for females
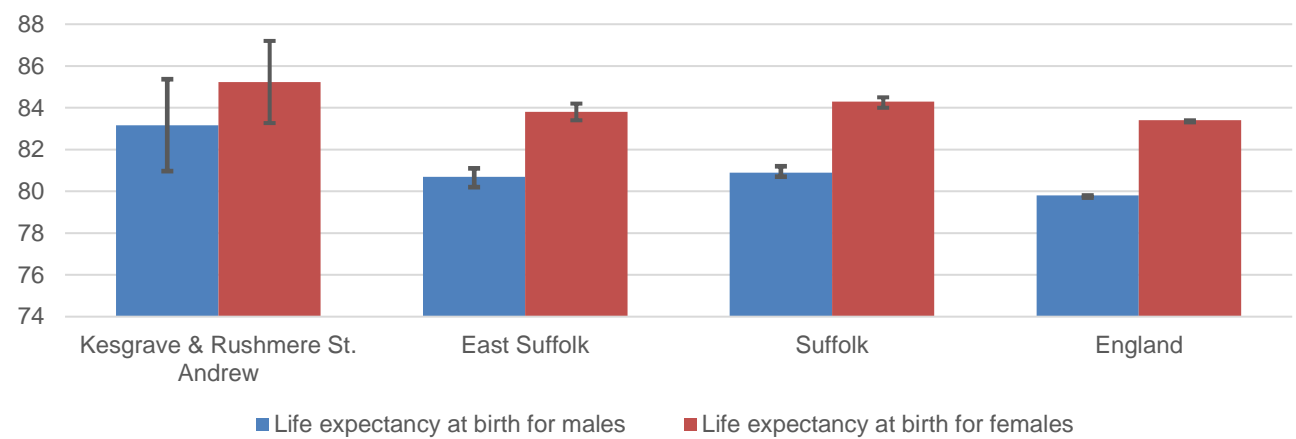

- Estimated life expectancy at birth for both males and females in Kesgrave and Rushmere St Andrew is above the East Suffolk, Suffolk and England averages.
- The estimated figure for male life expectancy in the division is 83.2 years (80.9 across Suffolk), while for females it is around 2 years longer, at 85.2 years (84.3 is the Suffolk average).

DEATHS, UNDER 75 YEARS, STANDARDISED MORTALITY RATIO

Legend: ■ Kesgrave & Rushmere St. Andrew ■ Suffolk Coastal ■ Suffolk ■ England
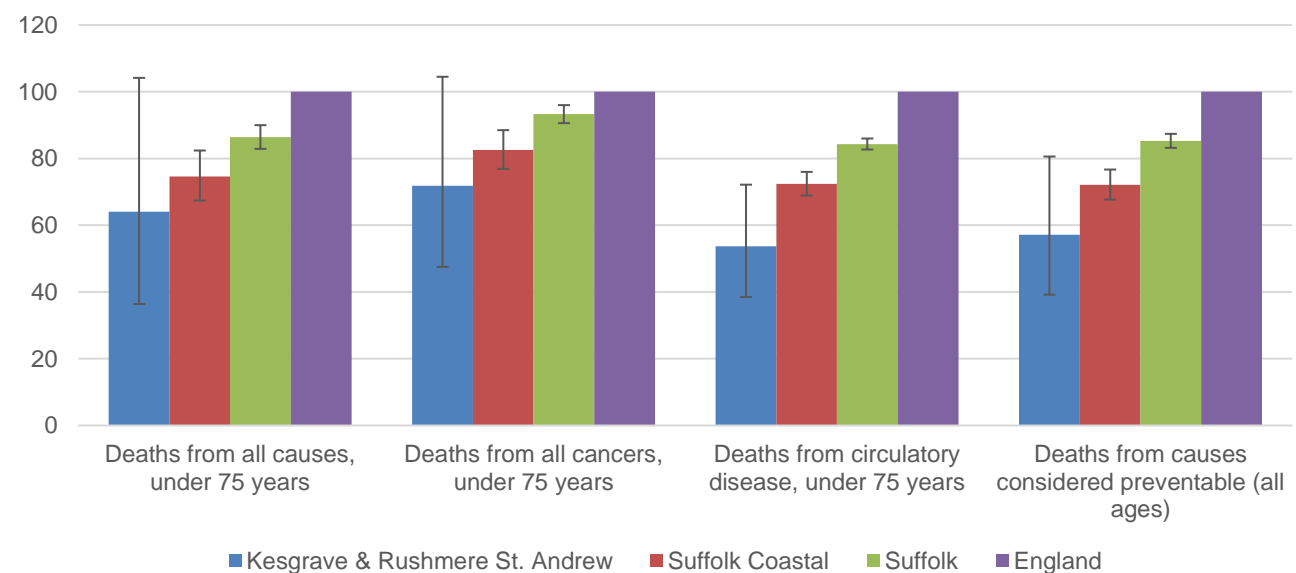

- In Kesgrave and Rushmere St Andrew, estimated death rates from all causes, cancers and circulatory disease are below the district, county and England level, indicating that health in the division is above average.
- The standardised mortality ratio data shown here means that for every 100 early deaths from all causes across England as a whole, there are an estimated 64 comparable deaths in Kesgrave and Rushmere St Andrew.
- It should be noted that the confidence intervals around these data are particularly wide due to the small number of deaths at the local level.

CRIME & COMMUNITY SAFETY
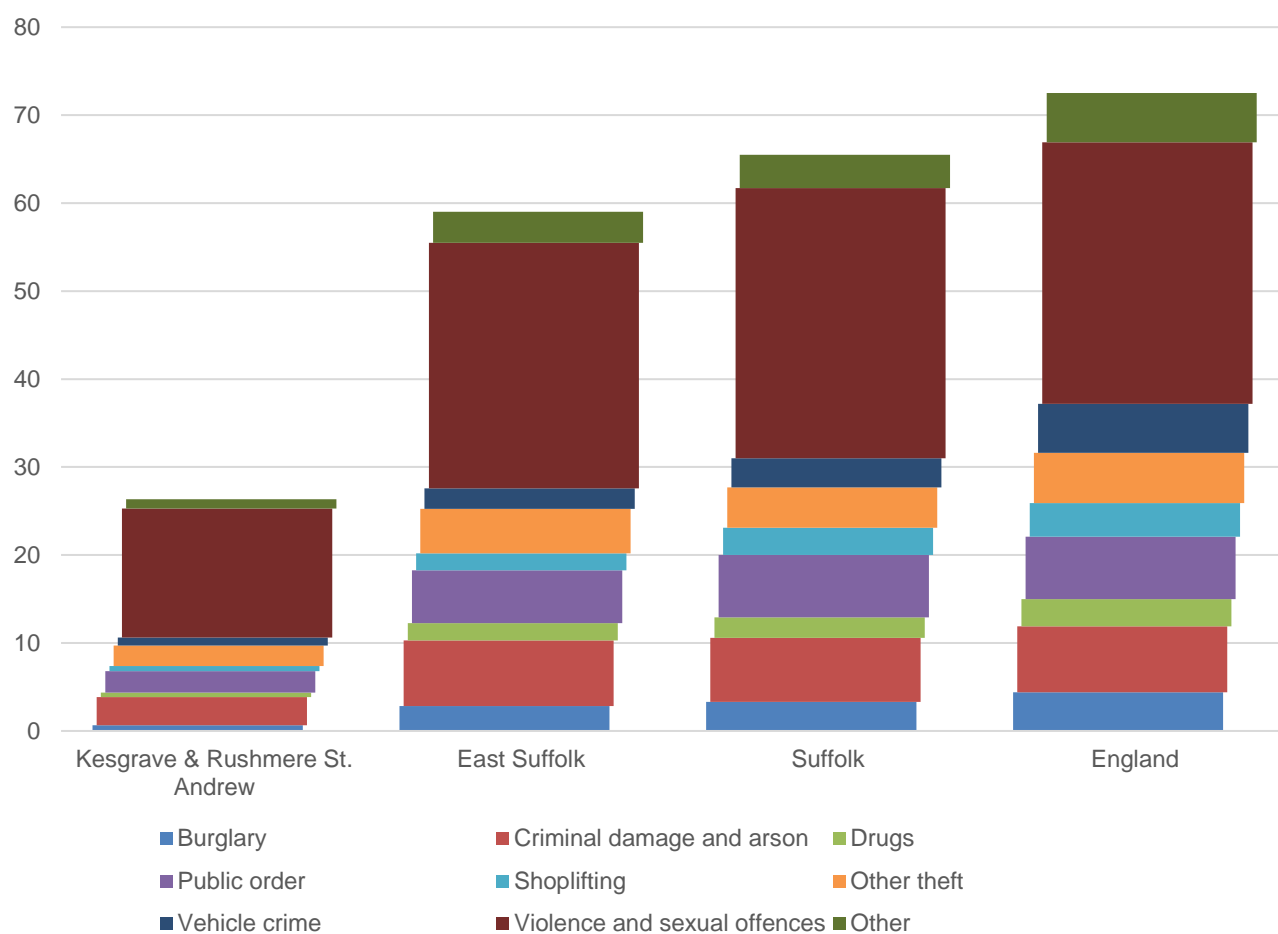

- Kesgrave and Rushmere St Andrew has a much lower rate of crime than the district, county and national average.
- In the year to the end of January 2021, there were 26 recorded crimes per 1,000 residents in Kesgrave and Rushmere St Andrew compared to 59 in East Suffolk and 66 across the county as a whole.
- Violence and sexual offences accounted for more than half of all recorded crimes in the division during this period.
- All types of crime are recorded in the division at a lower rate than across East Suffolk as a whole.
